

PMV®
Color / Black & White

'Plumber's Mate'

10" LCD Monitor
DVD and/or SD Recorder
Battery Optional

The Ratech PMV® model has quickly become one of the most accepted systems in the market today. The design features a 10" LCD COLOR display and separate built-in DVD Recorder making future replacement easy.

Two models are available - Model PMV-C featuring a full spectrum miniature color camera head measuring only 1.375" diameter coupled with a highly sensitive CCD chip and 16 high intensity LED lights.

Model PMV-BW is a high resolution black and white system, color ready, that features a camera head (0.5 lux) capable of providing excellent black and white pictures in low light conditions. With its built in hi-intensity LED lighting, the camera can easily be used in 2"-10" lines and sometimes larger depending on pipe conditions.

Both systems, color and black & white, are supplied with a hard cover case CCU (camera control unit), case mounted wheels, telescopic handle and tilt stand. The front panel includes system controls for the camera, lights, DVD Recorder and main power. A removable front cover includes a keyboard, power cords and accessories such as camera sleeves/skids and camera removal tool.

The cable reel is supplied standard with 200' of Gel Rod™ push cable (other lengths available) on a lightweight yet rugged steel frame featuring a noise-free slip ring assembly.
