

# Cable Reels

## Ergonomic Design

**Stands in Vertical or Horizontal Position**

**Balance Optimized**

**Multiple Sizes**

**Available in Stainless Steel**

Ratech has designed cable reels (coilers) that are ergonomical, lightweight, and extremely portable. Transporting these cable reels is quick and easy with the rear mounted wheels. You can easily roll these reels on or off your truck or in and out of your jobsites using the conveniently angled handle.

The reels can be operated both in the vertical (standing) position or placed on its side in a horizontal (sitting) position. The rubber feet mounted to the side allow the reel to sit in a stable position allowing the operator to retract the cable and camera with ease.

Ratech has available standard size and mini reels that complement your Ratech control unit. Standard size reels are available in a yellow or blue color and NOW in stainless steel as well. A handy cable reel protective cover is included at no charge to protect the work-floor from debris while you are inspecting a dirty sewer or drain. Standard reels hold Gel Rod™ cable ranging from 100'-400' lengths. Mini size reels are also available in a yellow or blue color and NOW in stainless steel. The mini reels hold Gel Rod™ push cable ranging from 50'-125' lengths. Mini reels work well with our Ultra Micro product line.

Larger style reels for mainline systems are also available. We can always custom-design a special reel for you (as seen on reverse).
