

Ultra Micro[®] Color / Black & White

Small Pipe Inspections

1" Color or 3/4" B&W or 3/4" Color

Miniature Cameras

Affordable

Lightweight

Ratech is pleased to offer the Ultra Micro video inspection system in color or black and white. Developed as a low cost system, the Ultra Micro[®] maintains the quality of our high end units in a small, compact, and affordable package.

The Ultra Micro[®] color camera measures only 1" Diameter by 1.6" in Length while our optimized color camera measures just 3/4" Diameter by 1" in Length. Due to its small size, the Ultra Micro[®] camera is capable of inspecting pipe diameters as small as 1" or 1.25" (color) straight runs and will negotiate multiple bends in 2" pipes and services. Lighting is accomplished by high intensity LED lights producing an excellent detailed picture.

The control unit can be a high resolution 10" color surveillance monitor with rear mounted jacks that include camera input, video in/out jacks for recording or playback and fuses for camera, lights and AC line. The monitor includes a sun shield which doubles as a screen protector when not in use. A carrying case is also available as an option.

The control unit can also be any of our quality built units such as the Elite series or Plumber's Mate.

Ultra Micro[®]

Color / Black & White

Specifications

Inspection Cameras

- Compact camera design - Color (1.0"D x 1.6"L) / Color (3/4"D x 1"L) / B&W (3/4"D x 1"L)
- Inspects from 1" - 4" pipes
- Power: 12vDC
